**Retraction – Sudbo J. Novel Management of
Oral Cancer: A Paradigm of Predictive Oncology.
Clin Med Res 2004;2:233-242.**

We have reviewed the Commission of Inquiry report regarding the fabrication of data by Jon Sudbo. The review article Sudbo published in *Clinical Medicine & Research*¹ is based, at least in part, on the fabricated data referred to in the Commission's report. We now retract the article in full, which supersedes our earlier expression of concern.²
